

Digital Print Advantages at Schumann Printers, Inc.

New in 2011, our Digital Imaging Department is an example of our continuing commitment to remain your “Complete (under one roof) Print Choice”.

Digital printing is ideal for high quality low volume print runs. Our digital presses can economically produce your business stationary, marketing/point of sale materials and sales collateral all in vibrant color. Digital printing also offers an affordable option for the production of article reprints, brochures, posters, postcards, reminder-notes and envelopes.

The ability to change elements such as text, graphics or images from document to document during a single run is a unique advantage of digital printing. This technology, also known as VDP (Variable Data Printing) has created an endless variety of marketing opportunities. From complete short run magazines with personalized covers to customized postcards, digital printing is the choice.

Our “under one roof” commitment enables us to print all of your publication’s auxiliary needs, from bind-ins and blow-ins to order forms and bellybands, all in house. This eliminates your need to coordinate deliveries or pay shipping and storage charges.

An experienced staff of experts is always on hand to assist you with the design and layout of your projects. Remember... “If you can envision it... We can do it!”
